Sand Viper™ Modular Drop Tee

- Are you tired of the cost of replacing your Drop Tee too frequently?
- Initial Field tests on The Urethane Lined Sand Viper™ Hopper Tee showed virtually "No Wear" even after six months and counting of using the most abrasive sand applications.
- This design uses Bailey-Parks Urethane's exclusive high wear resistant polyurethane.
- Utilizing the urethane wear adapters on the Sand Viper™ Modular Drop Tee:

- ✓ Allows the abrasion to take place in the removable adapters only, thereby eliminating the need of ever having to replace the Drop Tee itself.

- ✓ Allows for rotating the adapters for a much longer wear life.

- ✓ Allows for a variation of connectors - Male Threads, Female Threads or Victaulic connections.
